

Davide Chirichella

Computer Engineering Master's Student | Academic Tutor | Developer

Personal Information

Full Name	Davide Chirichella
Date of Birth	November 10th, 2003
Citizenship	Italian
Current Location	Bologna, Italy
Email	davide.chirichella2@unibo.it
LinkedIn	linkedin.com/in/davide-chirichella
GitHub	github.com/chirichexe

Profile

Master's student in **Computer Engineering** at the University of Bologna and **Academic Tutor** for System Administration. Specializing in the design and management of **distributed systems** and **microservices architectures**, with a core interest in building scalable, reliable, and resilient systems. Strong background in software development, DevOps, and cloud-edge computing.

Education

2025 – Present	Master's Degree in Computer Engineering <i>Alma Mater Studiorum — Università di Bologna, Bologna</i> Focus on Distributed Systems, CUDA parallel computing, and Go-based systems.
2022 – 2025	Bachelor's Degree in Computer Engineering <i>Alma Mater Studiorum — Università di Bologna, Bologna</i> • Thesis: “Performance Analysis and Monitoring in Cloud-Edge environments for IoT” • Project KOPIC: Developed a distributed architecture for orchestrating low-power IoT devices across the cloud-edge continuum using Kubernetes Operators, Cross-plane, and a full observability stack (Prometheus, Grafana, OpenTelemetry). • Curricular internship (150 hours) at the Department of Computer Science and Engineering (DISI).
2017 – 2022	High School Diploma <i>Liceo Scientifico Galileo Galilei, Potenza</i> Focus on Adobe Creative Cloud, Multimedia Content Production, and Graphic Design.

Experience

Feb 2026 – Pres	Academic Tutor (System Administration) <i>Alma Mater Studiorum — Università di Bologna, Bologna</i> • Supporting the course “System Administration and Security” for undergraduate students. • Instruction in Linux administration, security auditing, and automation.
Feb 2026 – Pres	Junior DevOps Engineer <i>HoDiritto (Startup), Remote</i> • Built and managed infrastructure, CI/CD, and monitoring for an early-stage MVP within a pre-acceleration program. • Technologies: Microservices, Terraform, Docker, and Kubernetes.
2023 – 2026	Software Engineer / Developer <i>Project Quality Systems S.R.L., Remote</i> • Designed and developed a C# desktop application for company audits. • Full-stack development of the corporate management system using React.js, Node.js, and MySQL.

Technical Skills

Languages	Go, CUDA, C, Java, C#, JavaScript (React.js, Node.js), HTML/CSS, SQL, Python.
Cloud/DevOps	Kubernetes, Docker, Terraform, CI/CD, Istio, Crossplane.
Observability	Prometheus, Grafana, OpenTelemetry.
Systems	Linux System Administration, Shell Scripting, Cybersecurity basics.
Tools	Git, Adobe Creative Suite (Photoshop, Illustrator, Premiere).

Languages & Honors

English	Cambridge English First (FCE) — Level B2.
Italian	Native speaker.
Projects	Contributor to various open-source distributed systems and DevOps projects on GitHub.
